

DIFFERENT INDUSTRY LEADERS, **SAME** MESSAGE

Fast Acting

“Because this technology only requires seconds to kill bacteria and other microorganisms, as opposed to 10 plus minutes for chemicals to do the same thing, we can place a room back into service faster, knowing it is safe for the next patient.”

-Rick Olivere, Bayhealth EVS team/Delaware

Greatly Reduced Hospital *C. diff* Burden

“The use of SteraMistTM in combination with the active isolation and antibiotic interventions has greatly reduced the hospital’s *C. difficile* burden. By moving to stricter isolation protocols and incorporating SteraMistTM technology into EVS cleaning protocols, this hospital has been able to stabilize their CDI rates even with the use of increasingly sensitive *C. difficile* detention methods and increased community prevalence rates.”

**-Dr. Helene Paxton, MS, MT (ASCP), PhD, CIC, (Infection Preventionist)
Saint Francis Healthcare, LLC/Delaware**

Lower HAI's

“HAIs have dropped to the lowest rates ever, along with the huge monetary savings ranging in the millions.”

-Dr. Dario Flores, Caja de Seguro Social/Panama

Competitive Price Points

“The process makes it safer for the operator and the cycle time is much quicker. Due to the simple nature and mobility of the device, the SteraMistTM system disinfects at a very competitive price point when compared with other technologies. It leaves no residual. This is fantastic for those clients with chemical sensitivities.”

**-Thomas Licker, Infection Control Technologies
(A Division of Insurance Restoration Specialists, Inc.)/New Jersey**

Safe for All Environments

“SteraMistTM is safe for all surfaces, including computers and soft furnishings, as well as for cleaning HVAC and duct systems. The high-level disinfecting system is considered a ‘green’ technology because the end product is oxygen and water. There is no exposure risk to patients or healthcare workers once the cleaning is finished.”

**-Dawn Marie Rumovitz, RN, BSN, MSN, CIC,
Infection Prevention Manager
at St. Mary’s Medical Center/Pennsylvania**

Total Decontamination

“Our EVS team recently responded to a request for assistance from a neighboring hospital that was experiencing an outbreak. The EVS team used SteraMist™ equipment to treat the unit and the results showed total decontamination, better than previous methods used.”

-Tom Johnson, Felder Services at Spring Hill Hospital/Alabama

Environmentally Friendly

“We have used SteraMist™ for several years to clean thousands of patients and OR rooms by our EVS staff, with significant positive impacts on our infection rates. Any cleaning team using this environmentally friendly SteraMist™ product that can demonstrate lower infection rates, cleaner rooms, and healthier environments, while minimizing the turn around time of our patient rooms, is sure to make the support services stand out, in my opinion.”

-Peter Arn, SINAI Hospital/Maryland

Large Space Efficacy

“Several weeks ago, our daycare operations called to inform us they had an outbreak of Hand, Foot and Mouth disease among several children. They had been trying for several weeks to control it but it seemed to still be spreading. We proposed using SteraMist™ during the weekend when they are closed. We applied SteraMist™ to the entire building on a Saturday and since that time they have not had a reoccurrence of the disease.”

-Jeff Wiesendanger, St. Mary Medical Center EVS/Pennsylvania

Exceeded Expectations

“Steramist™ sterilizes surfaces in a shorter time, allows protocols to be performed in a daily basis in tandem with our healthcare staff. The Steramist™ solution has produced verifiable results, and has helped patients along with reducing dramatically HAI overall care cost. Dropped rates from fifty (50) cases per one thousand (1000) ventilator days to four point five (4.5) for VAP. This latest benefit generated savings calculated in thirty (30) million dollars saving and more than a hundred lives over two (2) years using Steramist™ decontamination services.”

-Dr. Jaime Aleman Diaz, Executive Director of the National Health Services/Panama
